

I claim:

1 1. Printable media, comprising:
2 a sheet defining a front side, a rear side and a plurality of side
3 edges;
4 at least one strip of adhesive material on one of the front and rear
5 sides of the sheet adjacent to a first one of the plurality of side edges; and
6 a plurality of liners positioned over the at least one strip of
7 adhesive material.

1 2. Printable media as claimed in claim 1, wherein the sheet
2 comprises a paper sheet.

1 3. Printable media as claimed in claim 1, wherein the sheet
2 comprises an 8 ½ inch x 11 inch sheet.

1 4. Printable media as claimed in claim 1, wherein the adhesive
2 material comprises pressure sensitive adhesive.

1 5. Printable media as claimed in claim 1, wherein a second one of
2 the side edges is parallel to the first one of the side edges and the at least one
3 strip of adhesive material extends only partially from the first one of the side
4 edges to the second one of the side edges.

1 6. Printable media as claimed in claim 1, wherein the at least one
2 strip of adhesive material comprises a plurality of strips of adhesive material and
3 the plurality of liners are respectively positioned over the plurality of strips of
4 adhesive material.

1 7. Printable media as claimed in claim 1, wherein the at least one
2 strip of adhesive material comprises a single strip of adhesive material defining
3 a width, each of the plurality of liners define respective widths that are less than
4 the width of the single strip of adhesive material, and the plurality of liners are

5 positioned closely adjacent to one another over the single strip of adhesive
6 material.

1 8. Printable media as claimed in claim 1, wherein the side edges
2 define longitudinal ends and the adhesive material extends substantially from
3 one longitudinal end of the one of the plurality of side edges to the other
4 longitudinal end of the one of the plurality of side edges.

1 9. Printable media, comprising:
2 a sheet defining a front side, a rear side and at least first and
3 second intersecting side edges, each of the first and second side edges defining
4 opposing longitudinal ends, one of longitudinal ends of each of the first and
5 second side edges defining a common longitudinal end;

6 a first strip of adhesive material on one of the front and rear sides
7 of the sheet adjacent to the first side edge and extending substantially from one
8 longitudinal end of the first side edge to the other longitudinal end of the first side
9 edge; and

10 a second strip of adhesive material on the one of the front and
11 rear sides of the sheet adjacent to the second side edge and extending
12 substantially from one longitudinal end of the second side edge to the other
13 longitudinal end of the second side edge.

1 10. Printable media as claimed in claim 9, wherein the sheet
2 comprises a paper sheet.

1 11. Printable media as claimed in claim 9, wherein the sheet
2 comprises an 8 ½ inch x 11 inch sheet.

1 12. Printable media as claimed in claim 9, wherein the adhesive
2 material comprises pressure sensitive adhesive.

1 13. Printable media as claimed in claim 9, wherein the first strip of
2 adhesive material comprises a plurality of first strips of adhesive material, the
3 printable media further comprising:

4 a plurality of first liners respectively positioned over the plurality of
5 first strips of adhesive material.

1 14. Printable media as claimed in claim 13, wherein the second strip
2 of adhesive material comprises a plurality of second strips of adhesive material,
3 the printable media further comprising:

4 a plurality of second liners respectively positioned over the
5 plurality of second strips of adhesive material.

1 15. Printable media as claimed in claim 9, further comprising:
2 first and second liners respectively covering the first and second
3 strips of adhesive material.

1 16. Printable media as claimed in claim 15, wherein the first and
2 second liners include mitered ends adjacent to the common longitudinal end of
3 the first and second side edges.

1 17. Printable media as claimed in claim 15, further comprising:
2 a liner corner member adjacent to the common longitudinal end of
3 the first and second side edges.

1 18. Printable media as claimed in claim 9, wherein the first strip of
2 adhesive material defines a width, the first liner comprises a plurality of first
3 liners defining respective widths that are less than the width of the first strip of
4 adhesive material, and the plurality of first liners are positioned closely adjacent
5 to one another over the first strip of adhesive material.

1 19. Printable media as claimed in claim 18, wherein the second strip
2 of adhesive material defines a width, the second liner comprises a plurality of
3 second liners defining respective widths that are less than the width of the
4 second strip of adhesive material, and the plurality of second liners are
5 positioned closely adjacent to one another over the second strip of adhesive
6 material.

20. Printable media, comprising:

a sheet defining a front side, a rear side, first and second horizontally extending side edges, and first and second vertically extending side edges, each of the side edges defining opposing longitudinal ends;

a horizontally extending strip of pressure sensitive adhesive on the rear side of the sheet adjacent to the first horizontally extending side edge and extending substantially from one longitudinal end of the first horizontally extending side edge to the other longitudinal end of the first horizontally extending side edge;

a vertically extending strip of pressure sensitive adhesive on the rear side of the sheet adjacent to the first vertically extending side edge and extending substantially from one longitudinal end of the first vertically extending side edge to the other longitudinal end of the first vertically extending side edge;

a plurality of closely spaced horizontally extending release liners together covering at least a substantial majority of the horizontally extending strip of pressure sensitive adhesive; and

a plurality of closely spaced vertically extending release liners together covering at least a substantial majority of the vertically extending strip of pressure sensitive adhesive.
